THE KRYTERION ONLINE PROCTORING (OLP) SOLUTION

Real-Time, Remote Video & Audio Monitoring

Your candidates want a convenient and flexible testing option, and you want to maintain exam integrity.
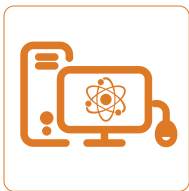

Kryterion's online-proctoring solution allows you to offer exams that are proctored remotely. Your candidates enjoy the convenience of being able to test at their home or office via the Internet. You gain peace of mind knowing your exams are professionally proctored and protected.

Kryterion Certified Proctors™

Kryterion Certified Proctors are focused solely on detecting and preventing unauthorized Candidate behavior. To ensure the security of your test program, our Proctors undergo an extensive training and certification process. They're trained to flag suspect behavior and take action based on your business rules.

Secure Online Proctoring Services for Your Market

Our years of experience allows us to create unique test-development and delivery solutions for many industries including:

Information Technology

Professional & Trade Associations

Corporate

Healthcare

Distance Education

Government

OLP Security

- Facial Recognition
- Keystroke Analytics
- Locked-down browser and testing environment
- Blacklist URLs
- Restricted Keystroke combinations
- Proctored live by Certified Proctors
- External camera for added visibility for Proctors
- Video/Audio recording of each test session
- Session review available for test sponsor at exam completion

Kryterion Certified Proctors act as deterrents to cheating and help protect the integrity of the exam by preventing content theft. Kyrterion's secure online testing removes the possibility of collusion between Candidate and Proctor as can happen in a physical test center.

Multiple Authentication Methods like our facial recognition and keystroke analytics make it nearly impossible to fake test-candidate identity.

Comprehensive Session Review documents every test session with video, audio, photos and transcripts.
